

AI-Powered Data Labeling at Hyperscale

CHALLENGE

Scale AI data labeling across multiple products while eliminating duplicate effort, improving annotation quality, and accelerating delivery for next-generation voice-enabled AI experiences.

AI-POWERED PLATFORM

Built an AI-driven data labeling platform with automated workflows, scalable data infrastructure, and intelligent tracking to streamline annotation, reduce duplication, and enable high-quality dataset creation across devices and products.

SOLVED FOR A GLOBAL SCALE

Delivered a scalable AI data platform that unified labeling operations, automated review workflows, and generated trusted datasets for millions of voice utterances while significantly reducing operational effort and costs.

IMPACT

Direct Benefits

15M+

Voice utterances processed
