

Data Observability for Reliable Travel Operations

CHALLENGE

Limited visibility into data pipelines impacted platform reliability, SLA compliance, and proactive issue resolution across critical travel services.

ENTERPRISE DATA OBSERVABILITY

Implemented an enterprise-wide data observability framework with automated monitoring, alerting, and governance to improve pipeline reliability and operational resilience.

SOLVED FOR A GLOBAL SCALE

Delivered real-time visibility into data health, automated incident response, and strengthened enterprise data governance across mission-critical travel operations.

IMPACT

Direct Benefits

80%

Automation of monitoring & alerting

70%

Faster identification of data pipeline failures

60%

Improvement in SLA compliance
