

Transforming Retail Execution with AI Vision

CHALLENGE

Improve shelf compliance, inventory visibility, and competitive intelligence while eliminating manual store audits and enabling data-driven retail execution.

AI-POWERED PLATFORM

Built an AI-powered computer vision platform that analyzes in-store images and videos to automate shelf compliance, detect out-of-stock products, optimize product placement, and generate predictive sales insights.

SOLVED FOR A GLOBAL SCALE

Enabled intelligent retail execution by processing 500K+ images annually across 5K+ stores, delivering 99% model accuracy to improve sales, operational efficiency, and merchandising decisions.
